

Experience studying and living in the UK this summer

Our three-week **Student Summer Programme (SSP)** provides you with a unique opportunity to gain a real taste of studying and living in the UK, and may help you consider if further study at **WMG, University of Warwick** is for you.

The University of Warwick is a world-class Russell Group University widely recognised as a leader in research and education and has been consistently ranked as one of the UK's **top 10 universities** (The Times and The Sunday Times Good University Guide 2018).

We are one of the largest academic departments at the University of Warwick, and have been delivering **high quality education** for 37 years. Innovation, creativity and industry-relevant education all define the lively and interactive culture that you will be part of as an SSP student. From our experience of delivering successful full-time Master's level education and executive training programmes, we introduced the first ever SSP in 2017.

The course

The **three-week course** will be tailored to your current college/university's requirements, taking into account your academic background and career aspirations. Modules usually include **UK History and Culture, Business Negotiation, Project Management, Marketing, Finance, and Innovation**. Plus, as we work with many world-renowned companies, you will have the chance to visit some of them to find out how real businesses in the UK operate.

Accommodation and campus life

The University of Warwick has an **award-winning campus** situated in the heart of England. It is surrounded by beautiful green space, but with easy access to transport links. We are **one hour from London** by train, and Birmingham Airport is just 20 minutes away.

You will be staying on campus in your own bedroom with either a communal bathroom or an en-suite, and a full kitchen shared between a number of students. Free wifi, bedding and a social space are included. You can expect a vibrant experience with a true flavour of the range of art, sports and social facilities on offer.

"The programme exceeded my expectations. I experienced the real British University life."
